

CASE STUDY

NY Presbyterian Queens OR Renovation

LOCATION

Queens, NYC

With DIRTT's technology-driven approach, we provided this New York Health System with visual, design, and cost certainty for their OR Renovation project.

Providing our client with certainty at every stage was key. Leveraging DIRTT's 3D design platform with embedded product logic, our team was able to share renderings of proposed solutions along with cost implications of options in real time, empowering them to make decisions and move forward confidently.

Ewing Cole

GENERAL CONTRACTOR

Lendlease

The renderings our design team provided pre-order lined up perfectly with the final installed solution.

Our team coordinated closely with the project team and DIRTT to ensure seamless integration between electrical, plumbing, and med gas, while maintaining the overall design intent. We worked closely with other trades so that the conventional framing and DIRTT manufactured elements came together flawlessly.
